Dip en Voerbakke

Built for the Bush. Trusted by Game Farmers.

A giraffe feeds from a Standard roll-dip trough in the field

3 sizes to suit any species • Steel or aluminium construction • 3mm plate thickness • Built to withstand years in the veld

Roll-Dip & Feeder Troughs

Heavy-duty roll-dip and feeder troughs, built for game farms, hunting properties and livestock operations. Each unit is fabricated from thick-gauge steel or aluminium plate for a long service life outdoors, and is available in three sizes to suit anything from springbok to buffalo and rhino.

Divided dip/feeder trough, galvanised finish

Feeder trough, weatherproof painted finish

Available Sizes

Size	Length	Width	Height	Feeder Height
Springbok	1m	1m	700mm	200mm
Standard	1m	1m	1m	300mm
Buffalo / Rhino	2m	1m	1m	300mm

Construction

- Available in Steel or Aluminium, both in 3mm plate thickness
- Divided internal sections for separating dip and feed, or feed types
- Raised, reinforced legs with wide footplates for stability on uneven ground
- Rolled top edges throughout to eliminate sharp edges
- Weatherproof finish suited to permanent outdoor installation
- Springbok, Standard and Buffalo/Rhino sizes cover small to very large game

In the Field

Our troughs are already at work on game farms across the country — from browsers and grazers to Africa's largest antelope.
